👤 PROFILE

Visionary Product Leader and Co-founder with a robust background in Industrial Engineering and Technology Management. Leveraging extensive expertise as an ERP Finance Specialist and Scrum Master, I specialize in integrating complex financial systems and Machine Learning solutions. At Logia Initiative, I spearhead the development of Agentic AI architectures to automate GRC and corporate audit workflows. I excel at driving product roadmaps from ideation to enterprise scale, blending Agile methodologies with data-driven insights to enhance operational efficiency and scale startups within global ecosystems like YCombinator and Techstars.

🎓 EDUCATION

Master Management Technology (M.M.) <i>Universitas Multimedia Nusantara</i> 🌐	08/2020 – 02/2022 Tangerang
• Thesis: "Integration of Manufacturing Execution Systems (RFID) with ERP Systems" for automated data capture and operational efficiency. • Core Competencies: Specialized in Innovation Management, Digital Transformation, Agile Project Management, and Financial Engineering for tech ventures.	
Industrial Engineer (S.T.) <i>Institut Teknologi Indonesia</i> 🌐	08/2015 – 08/2019 Tangerang Selatan
• Research: Conducted technical research on Predictive Maintenance using Boomers to optimize equipment maintenance schedules & Identification Problem using K-Means Clustering (Data Mining) • Leadership & Academics: Served as a Laboratory Assistant for Statistics and Integrated Industrial Labs; coordinated peer tutoring as Academic Chairman	

🧠 SKILLS

ERP • Oracle E-Business Suite • Oracle Fussion • Odoo • SQL • Python • Excel • Journal Accounting • Project Management • SDLC • Feasibility Study • Machine Learning

📁 PROFESSIONAL EXPERIENCE

Product & Business Strategy <i>Logia Initiative</i>	09/2025 – Present Tangerang Selatan
• Spearheaded the product vision and roadmap for Logia AI, an Agentic AI platform automating Enterprise Audit and GRC processes from ideation to MVP. • Architected Agentic AI logic for real-time risk identification, continuous compliance monitoring, and automated evidence collection. • Integrated deep financial domain expertise and ERP systems into the AI engine to improve audit precision. • Create a Digital Transformation Solution for SME	
ERP IT Business Analyst - Financial Business System <i>Modinity Group</i>	03/2025 – 08/2025 Jakarta Selatan
• Led the Financial Module ERP implementation, supporting Finance, Tax, and Accounting teams throughout the transition. • Managed end-to-end implementation tasks and issue resolution, ensuring seamless cross-departmental coordination.	
Product Owner ERP Finance <i>PT. Asuransi Jiwa IFG - Asian Technology Solution</i>	07/2023 – 02/2025 Jakarta Selatan
• Directed the end-to-end development of the ERP General Ledger using Oracle E-Business Suite (EBS). • Architected and implemented a new Chart of Accounts (CoA), mapping complex historical transactions into the new structure. • Acted as Scrum Master, managing project backlogs and Agile ceremonies to maintain high-velocity development cycles.	

- Managed full-cycle implementation of core modules, including AP, AR, Cash Management, and Fixed Assets.

IT Product Owner

PT. Esensi Solusi Buana

09/2022 – 03/2023
Tangerang

- Managed daily product development and backlogs by collaborating with Engineering and Design teams to prioritize business value.
- Translated complex business requirements into actionable user stories and technical tasks.
- Led system integration processes with third-party vendors and assisted Quality Assurance in User Acceptance Testing (UAT).

Management Development Program

PT. Pan Brothers Tbk & Group

01/2020 – 08/2022
Tangerang

- Optimized business processes and resolved operational bottlenecks within the **RFID System Project** using SAP.
- Utilized data analysis tools to diagnose and resolve technical issues within the RFID ecosystem, ensuring data accuracy.
- Designed and executed company-wide digitization frameworks as part of a high-stakes digital transformation initiative.

AWARDS

Digital Talent Scholarship

08/2019

Ministry of Communication and Informatics Indonesia

Awarded the **Digital Talent Scholarship (DTS)** for Machine Learning, specializing in predictive modeling and AI algorithms through an intensive program by the Ministry of ICT.

Finalist of Statistics Essay Competition

11/2018

The 13th Statistika Ria Institut Pertanian Bogor

Achieved **National Finalist** status in the Statistics Essay Competition at IPB University for a research paper titled "**Data Monetizing**," demonstrating advanced analytical skills in leveraging data for strategic economic advantage.

Advanced methodology for implementing SAP ERP solutions in enterprise environments

ERP Course with Odoo Series #1: Roadmap, Business Processes, and ERP Implementation

10/2021 – 10/2021
Online

Persatuan Insinyur Indonesia Learning Center

Comprehensive ERP implementation course covering business processes and roadmapping

Exploratory Data Analysis in Python

11/2019 – 11/2019
Online

DataCamp.com

Data analytics and programming skills in Exploring and Analyzing Data

PROJECTS

Landing Web Page Development

07/2026

Arsenio Trans Travel Platform

- Engineered a fast, responsive travel booking platform using React, Vite, and Tailwind CSS.
- Integrated a secure WhatsApp automated booking feature for seamless client-admin communication.
- Applied advanced technical SEO and clean code architectures to ensure high maintainability and web visibility.

SQL Data Analysis Simulation Operational & Inventory Optimization for NusaMart Retail Chain

05/2026

SQL Data Analysis simulation retail operation & inventory (individual project)

This project demonstrates my SQL skills in data analysis and simulation to optimize operational and inventory processes for NusaMart, a retail chain.

CV. Kotig Karsa - Innovative Technology Solutions

01/2025 – 10/2025

Optimizing Business through Innovative Technology Solutions

Co-founded and led a global IT firm specializing in digital transformation through AI, automation, and data analytics. I directed the development of innovative solutions, including AI Chatbots, Digital Kiosks, and cloud-based business systems (POS & E-Commerce), to optimize operational efficiency and customer engagement across various industry sectors."

Logia AI: Integrated Credit Scoring & Fraud Validation System

12/2025

End-to-End Machine Learning Solution for Consumer Loan Risk Assessment

Developed an AI credit scoring system for consumer loans using Random Forest to automate risk assessment. The platform features integrated fraud detection, providing real-time document validation and data integrity checks to streamline onboarding while significantly mitigating credit risk (NPL).

Warehouse Management System (WMS) Development Grant

10/2025

Strategic Functional Design for SCLC-ITI Certification Programs

- Initiated a self-led project to design and grant a comprehensive **Warehouse Management System (WMS)** blueprint to the Supply Chain Logistics and Center (SCLC-ITI) as a practical tool for professional certification.
- Authored a detailed **Functional Specification Document (FSD)** covering the end-to-end warehouse lifecycle, including Master Data, Inbound/Outbound logistics, and real-time inventory tracking.
- Mapped complex industry workflows such as **FIFO/FEFO/LIFO rotation**, **Quality Control (QC)** inspections, and **Wave Picking** strategies to ensure the system meets global logistics standards.
- Collaborated with the institution to align system functionalities with the national logistics curriculum, enhancing the quality of hands-on training for aspiring supply chain professionals.

Logia AI Development

11/2025

Agentic AI for Enterprise Audit & GRC

- Leading the vision and end-to-end development of an Agentic AI platform specialized in automating Enterprise Audit and GRC processes.
- Architecting AI logic business for real-time risk identification and continuous compliance monitoring.
- Managing the product roadmap from ideation to MVP, successfully navigating the Techstars Accelerator selection process.

Gekko (Social-Productive Economic System)

12/2021 – 05/2022

Innovative Transaction and Economic System through the Gekko MART Platform with Collateral-Free and Interest-Free Business Credit Schemes.

As **COO**, I lead the operational strategy and industrial structure of Gekko. My core contributions include:

- **Operations Management:** Overseeing the end-to-end supply chain and distribution for the Gekko MART platform.
- **Model Implementation:** Executing the "Wiraniaga" program, providing interest-free retail credit to foster economic independence.
- **Strategic Growth:** Directing recruitment targets and operational workflows to ensure business scalability and market sustainability.
- **Team Leadership:** Building a disciplined work culture to achieve financial milestones and long-term growth.
